SUMMARY

MERN Stack Developer at HELP Human Rights since April 1, 2024. I design, develop, and maintain web apps using MongoDB, Express.js, React, and Node.js. I work alongside groups to produce large-scale applications that help human rights causes. I'm interested in making everything fit together perfectly, making it faster and ensuring that it is well protected. Furthermore, I review codes with others in addition to solving problems so that we stay up-to-date on industry movements, which allow us to provide better results that increase our digital outreach and advocacy efforts.

WORK EXPERIENCE

MERN Stack Developer , HELP Human Rights Orgnization **1st Apr 2024 - Present**

- **Design and Development:** Create, develop, and maintain web applications using the MERN stack (MongoDB, Express.js, React, Node.js) to support the organization's mission.
- **Collaboration:** Work closely with cross-functional teams, including designers, product managers, and other developers, to build scalable and efficient applications.
- **Integration:** Ensure seamless integration of front-end and back-end systems, maintaining a cohesive user experience.
- **Performance Optimization:** Optimize application performance for speed and scalability to handle increasing user loads.
- **Security:** Implement robust security measures to protect user data and ensure application integrity.
- **Code Reviews:** Conduct and participate in code reviews to maintain code quality and share knowledge with team members.
- **Troubleshooting:** Identify, diagnose, and resolve technical issues and bugs in a timely manner.
- **Industry Trends:** Stay updated with the latest industry trends, tools, and technologies to ensure the continuous improvement of application.
